DETAILED ACTION

Applicant's communication of 1/4/2001 has been received. The following action is in response.

1. Applicant's election with traverse of the species (b) indicated on page 2 in the OA of 12/7/00 in Paper No. 5, dated 1/4/01 is acknowledged. The traversal is on the ground(s) that no undue burden is placed on examiner. This is not found persuasive because the election requirement is under species.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 1-3 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5.

Claims 4-8 are examined under the merits, and claims 9-12 has been canceled by applicant's response of 1/4/01.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 4-5 and 6-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In reading the above claims, it is noted that the examiner and applicant disagree as to what claims read on the elected species. Applicant's attention is drawn to MPEP § 821.

The examiner determined that species (b) is disclosed on pages 30-32 of the specification.

Application/Control Number: 09/249,660

Art Unit: 2651

As found therein, there is an offset capability predicated on stored information indicative of optimum offset values – element 64. Such an element is not found in the above claims, and does not read on the elected species.

Claims 6 and 7 are duplicative. The examiner can not ascertain any patentable difference between the claims, and hence they are considered to be duplicative of one another. The examiner suggests, canceling claim 6 for instance. Claim 8 doesn't correct the above problem and falls with its parent claim.

As far as the claims recite positive limitations the following rejections are made.

6. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by either the acknowledged prior art or Aoshima.

As far as the examiner can determine, claim 4 recites the acknowledged prior art system disclosed on page. 7, HEI 1-325634. A copy and English translation of such prior art is respectfully requested in order to complete the search report.

Also, Aoshima provides for a tracking error signal system, in which during periods of no recording, no beam power, a tracking error signal is developed, and that during other periods a held values is provided for – see the description at col. 4, lines 57 plus for instance.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kaku et al – depicting the ability of having a tracking error signal during a non-recording period, and no tracking offset during recording/erasing operation as disclosed.

Allowable Subject Matter

7. Claims 7 and 8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aristotelis M Psitos whose telephone number is (703) 308-1598. The examiner can normally be reached on 8-4 EST, M-Thursday.

Art Unit: 2651

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Hudspeth can be reached on (703) 308-4825. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-6606 for regular communications and (703) 308-6606 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-4700.
